

The background of the slide is a light gray gradient. It is decorated with numerous realistic water droplets of various sizes. Some droplets are large and prominent, while others are small and subtle. They are scattered across the slide, with a higher concentration in the top-left and bottom-right corners. Each droplet has a soft shadow and a highlight, giving it a three-dimensional appearance.

# IT2605 PRACTICAL ASSIGNMENT

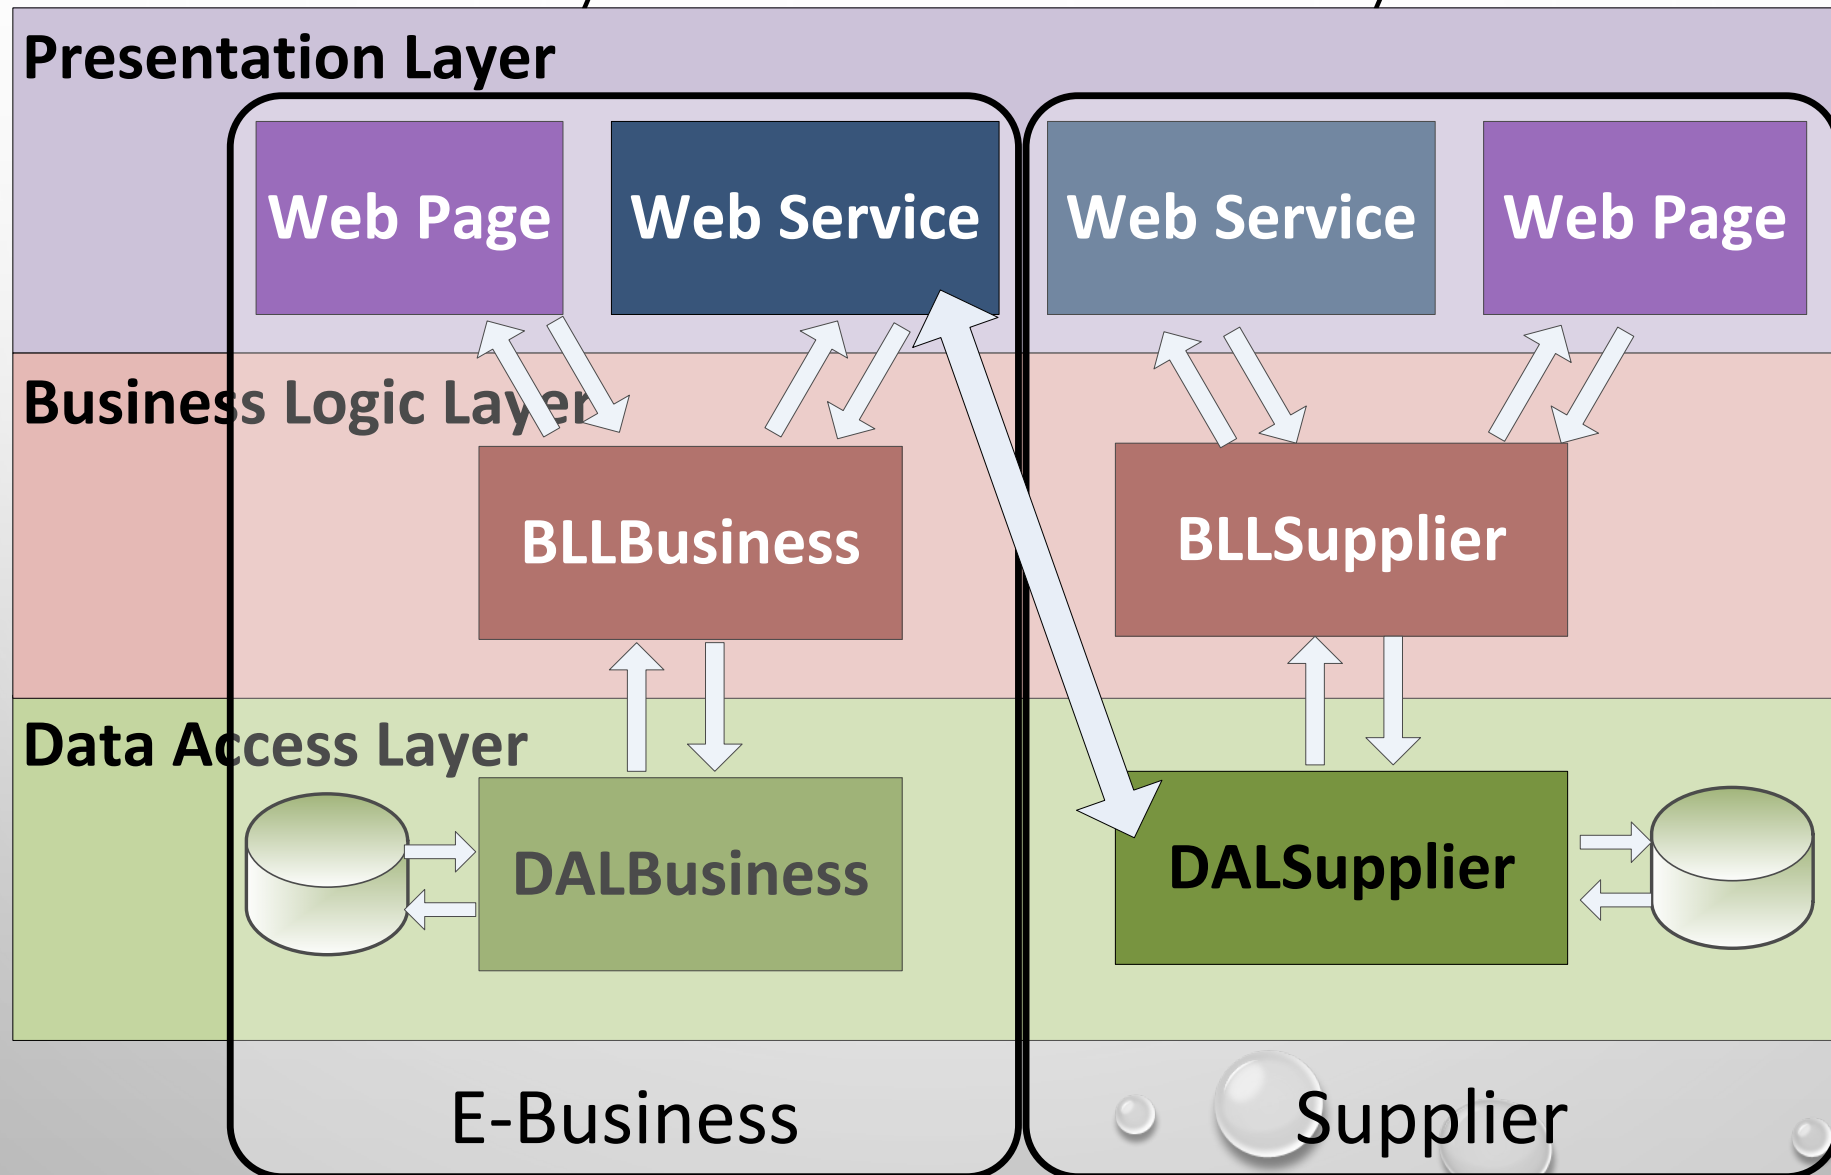

E-BIZ AND SUPPLIER

# E-BUSINESS SEND/RETRIEVE DATA FROM/TO SUPPLIER

# SUPPLIER SEND/RETRIEVE DATA FROM/TO E-BUSINESS

# ASSIGNMENT

- Do this assignment in pair.
  - You will be given half of a puzzle with your name and you can only pair with someone who has the other half of the puzzle.
  - Let your tutor know who is your partner.
  - This assignment constitutes 30% to your ICA.
  - Submission on week 12 during lesson time, each pair will have 5 minutes to demo.
  - Deadline will not be extended.
- 

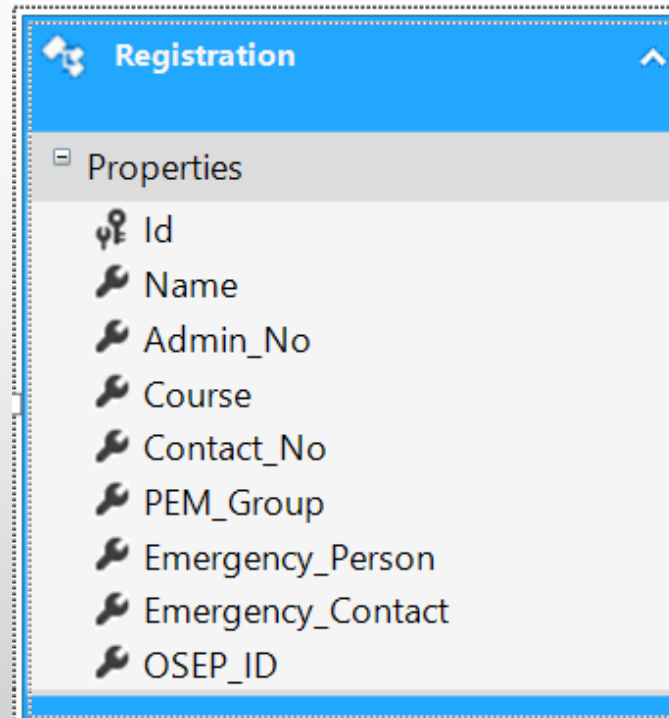

# SCENARIO

- FLY-TA is a travel agency that organise trips for polytechnic to overseas exchange program. Each program is created and open to all polytechnic students to apply. However each polytechnic have their own registration website as they keep more information that the agency requires.
- NYP is one of the polytechnic that participate in this exchange program.

# TASK - 1

- Using the databases provided, create 2 **Three-Tier** Project Solution (One for NYP, One for FLY-TA)
- In NYP project,
  - Create web pages
    - Consume FLY-TA Web Service to retrieve and display information on the available exchange program.
    - Include a button/link beside each program for students to register.
    - Students can register for all programs. After each successful registration, invoke FLY-TA web service to **increase** the number of registered seats
  - Create a web service
    - Expose student's information to FLY-TA (Only the necessary info should be displayed)
  - Refer to database schema on what fields are required for registration
- *Question for thoughts: at which **LAYER** should we call the function to register student and to increase the number of registered seats?*

# TASK 1 – NYP DATABASE

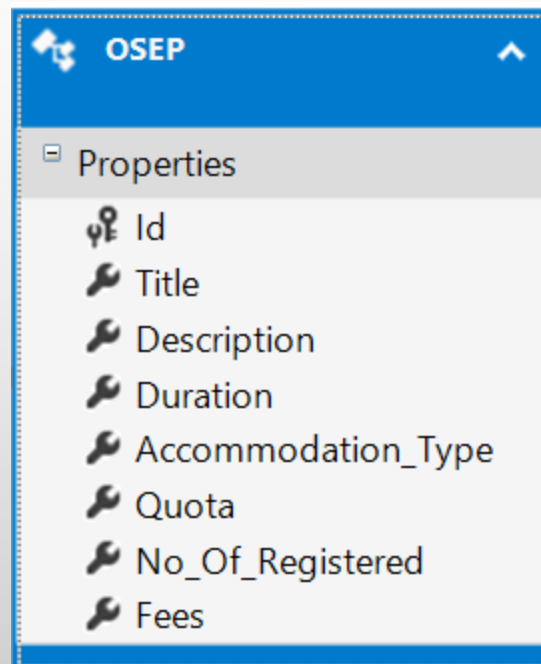

# TASK - 2

- In the FLY-TA Project
  - Create a web page to create exchange program
    - Accommodation Type: Hostel or Home-Stay
  - Create a web page to retrieve and display **ALL** exchange program details
    - On selecting the exchange program, display the list of students (Name, Admin No, Contact Number, Course) who register for it.
  - Create a web service
    - Retrieve the list of **AVAILABLE**(there are still available quota) exchange programs and its details
    - **Increase** number of registered seats for the exchange program

## TASK 2 - FLYTA DATABASE

# MARKING SCHEME - 1

Project	Task	Marks
NYP	Web page to retrieve and display list of exchange program from FLY-TA	3
	Web page for students to register for the program and reduce the available seats on FLY-TA website	4
	Web Service to expose student's information	3
FLY-TA	Web page to create exchange program	1
	Web page to display exchange program details and the list of students who register for it	4
	Web Service to retrieve the list of exchange programs and its details	2
	Web Service to reduce number of available slots	3
Overall	Correct flow of data	4
	Three-Tier for both application	6
TOTAL		30

# MARKING SCHEME - 2

- Master Page and Form Validation are not required
- Aesthetically pleasant/beautiful Website will not get extra marks.
- **6 Marks will be SUBTRACTED from each project that is not THREE TIER**

# NOW

- Please start to find your partner, look for your tutor to book the presentation slot
- You may ask your tutor more question if you are unclear about the assignment.
